Indice exhaustiv de cuvinte și forme

Indicații de utilizare a Indicelui

Toate cuvintele, variantele și formele din coloana dedicată transcrierii interpretative (coloana din stânga paginii, în formatul tipărit) au fost cuprinse în prezentul **Indice**, cu trimiterile la numărul filei de manuscris unde se găsesc în original cuvintele/formele supuse interpretării.

Indicațiile dintre paranteze se referă la numărul de ocurențe ale cuvântului pe respectiva filă. De exemplu: *albinele, 132^{v}(x2)* înseamnă că la fila 132^{v} cuvântul *albinele* apare de două ori.

În cazurile în care două sau mai multe cuvinte sunt în text unite prin cratimă, le-am separat în **Indice** și le-am tratat pe fiecare dintre ele ca pe o intrare de sine stătătoare. De exemplu, *aducându-li-se* a fost separat în componentele: *aducându-*, *-li-*, *-se*.

Simbolurile au fost explicate pe larg în **Nota asupra ediției**. Astfel, parantezele unghiulare indică fragmente de cuvinte existente în manuscris, dar ilizibile datorită deteriorării filelor; aceste fragmente de cuvinte au fost complinite contextual de către editori, potrivit logicii enunțurilor. De exemplu: *<aceas>ta*.

Parantezele drepte marchează fragmente de cuvânt inexistente în manuscris, care au fost considerate de editori necesare și au fost adăugate în coloana cu transcrierea interpretativă, pentru a se susține logica textelor. De exemplu: *alte[le]*.
